VMP

SOFTWARE

MX

SERIES CONTROLLER

A10s Pro

RECEIVING CARD

VMP is an all-new display control software that integrates design, management, and monitoring into one single platform.

When paired with the flagship MX Series controller and A10s Pro receiving card, an incredibly professional LED solution is realized, providing stunning image quality, precise color adjustment and an intuitive software experience.

This represents a totally new solution for managing high-end applications such as fine-pitch LED installation, studio broadcasting, touring, corporate events, virtual production and E-sports.

DUAL BOOSTERS

FOR EXCEPTIONAL IMAGE DISPLAY

Utilizing Image Booster 2.0 and Dynamic Booster, grayscale performance, color performance and contrast ratio are dramatically improved.

Image Booster

Dynamic Booster

Power saving with dynamic algorithm

With real-time analysis, brightness is adjusted dynamically frame by frame, saving 20%-40% power, extending the lifespan of an LED display.

(* Exclusive supported by MX40 Pro or the next products)

Test items

Fine grayscale

22bit+, 64 times grayscale improvement, 0.002nits precise control, ultra-precise image for stunning realism.

More realistic color

Fully automated color standardization, calibration and verification, self-adapts to color gamut, $\Delta E < 2$.

Higher contrast ratio

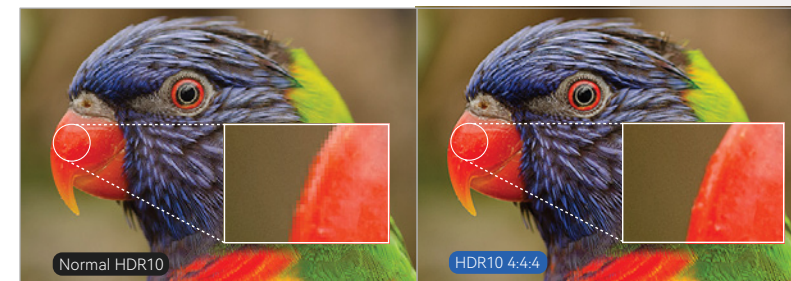

By enhancing bright and dark content details to the ideal level, an SDR source can deliver HDR-like effect, ensuring no overexposure in bright areas and no loss of detail in shadows.

HDR10 4:4:4

VIRTUAL PRODUCTION WITH MORE REALISTIC IMMERSION

The only comprehensive 4K@60Hz 10bit 4:4:4 solution in the industry presents an ideal environment for virtual production that puts you in the scene, representing a new evolution in HDR applications.

FLEXIBLE FRAME RATE

FOR SMOOTHER VISUALS

Supports 240Hz high frame rate, frame multiplication, frame multiplexing and adaptive frame rate, providing a super smooth filming.

(* Exclusive supported by MX40 Pro or the next products)

COLOR ADJUSTMENT AT YOUR FINGERTIPS

Color Replacement

Supports unrestricted color replacement, with minimal impact on other colors.

(* Exclusive supported by MX40 Pro or the next products)

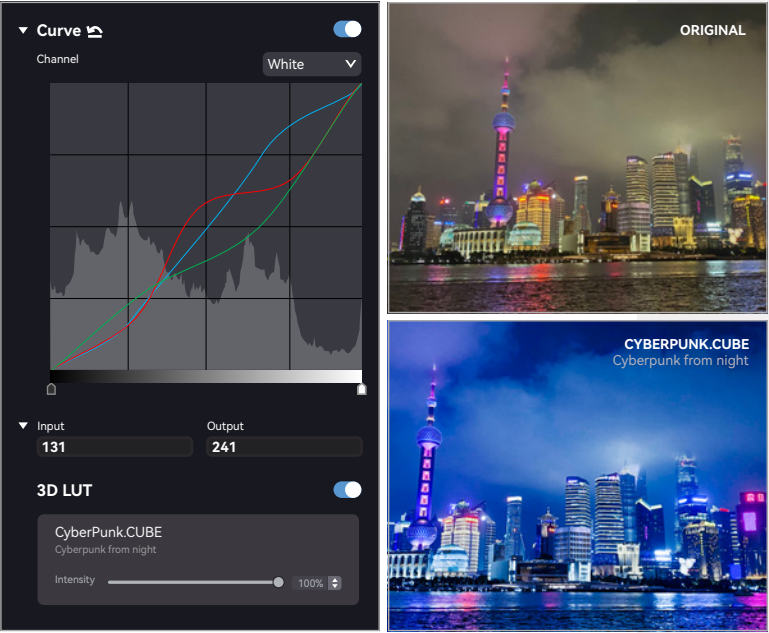

14CH Color Correction

Precise adjustment of hue, saturation, and brightness of primary, secondary and tertiary colors, with basic adjustment of black and white, ensuring perfect colors that retain their intended beauty.

(* Exclusive supported by MX40 Pro or the next products)

Red	Orange	Yellow	Lime	Green	Turquoise	Cyan
Cobalt	Blue	Violet	Magenta	Crimson	Black	White

COLOR CURVE & 3D LUT

FOR CREATIVE SCENES

Curve adjustment and importing of 3D LUT files let you manage color in creative and artistic ways, just like a Hollywood colorist.

(* Exclusive supported by MX40 Pro or the next products)

CONTRAST & BLACK LEVEL

FOR IMPRESSIVE DETAILS

Allows independent adjustment of highlights and shadows by contrast and black level, avoiding overexposure in bright content but delivering rich details in dark content.

QUICK AND EASY SCREEN MAPPING

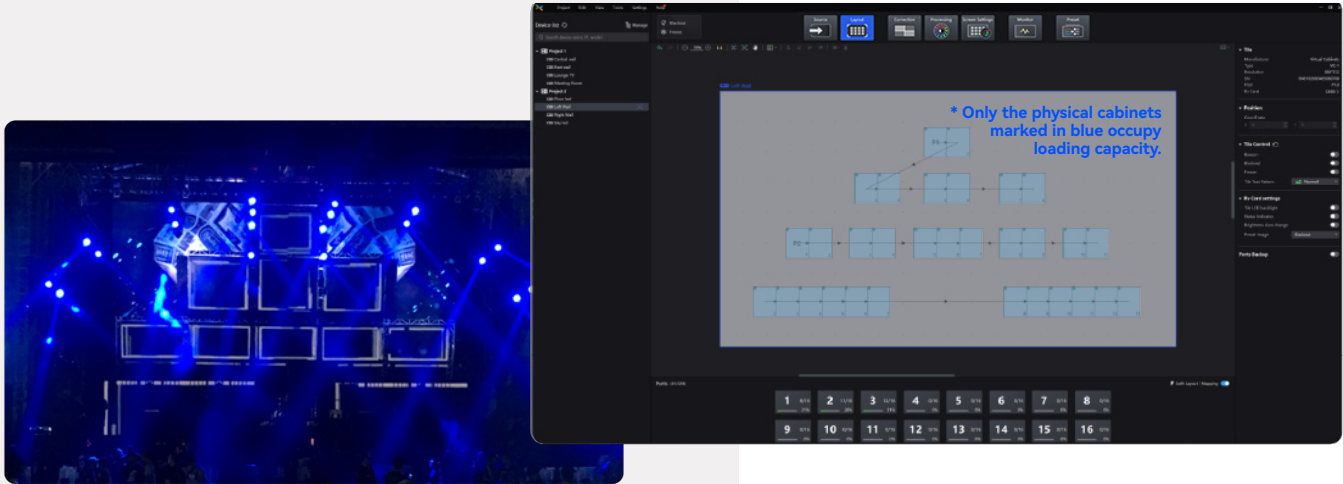

Screen mapping can be done easily on the software canvas with a mouse. Auto detection of connected cabinets and exporting of screen mapping file in advance serve to greatly increase operational efficiency.

FREE FROM RECTANGULAR CALCULATION MAXIMIZING THE CAPACITY

Loading capacity is calculated by the physical cabinet pixels, free from rectangular limitation, helping maximize the loading capacity of controllers. No more capacity waste from leaving blank or irregular shape designs. Create without limits!

(*Exclusively supported by A10s Pro)

IDENTIFY TOOL

FOR QUICK ADJUSTMENT

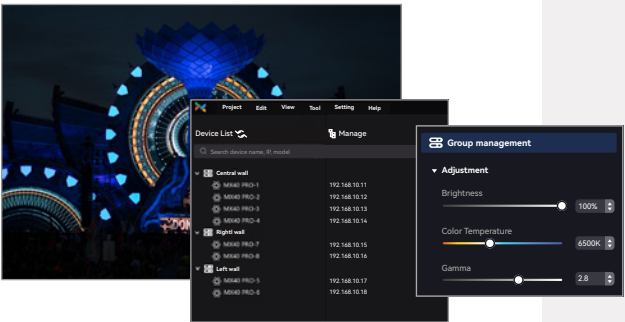

With the Identify Tool, cabinets and controllers can be located quickly. After receiving command from VMP software, LED screen will show the position of specific cabinets and controllers accurately, making relevant adjustment much quicker and easier.

S:01 P:01 #001	S:01 P:01 #003	S:01 P:01 #005	S:01 P:01 #007
S:01 P:01 #002	S:01 P:01 #004	S:01 P:01 #006	S:01 P:01 #008

GROUP MANAGEMENT MADE EASY

All devices are grouped by screens, making multiple screen management easier and more efficient than before.

VISUALIZED SEAM CORRECTION

Seam correction can be completed rapidly with an interactive and visualized design. Visually locate and select the seams simply by using a cursor, then directly view the screen to adjust the seams in the software, greatly improving efficiency.

SCENARIO PRESETS

Save all parameters of inputs and outputs into presets, providing quick and easy retrieval with a single click.

WHAT YOU SEE IS WHAT YOU GET

Canvas monitor and source preview allow for recognition of screen display status in real time and easy fitting of content to screen.

A10s Pro SPECIFICATION

5G & 8K UHD LED Display Solution

ALL-NEW 5G & 8K CONTROL SYSTEM

CX80 Pro CA50E

Single-port input with 8K loading capacity, and ethernet output port with 5G ultra-large bandwidth, 1 controller, 16 network cables, easy to load 8K LED screen, greatly simplify 8K system solution chain of ultra-high-definition, high frame rate, high bit depth.

1G bandwidth

To control a 8K wall, with 1Gpbs transmission,64 cables are required.

5G bandwidth

To control a 8K wall, with traditional 5Gpbs transmission,16 cables are required.

FLEXIBILITY BY MODULAR DESIGN

The CX80 Pro has multi options of 4K and 8K input ports and adopts a modular design, which can be flexibly chosen according to customers real needs, greatly improving operational efficiency.

CX80 Pro

Input card options

Option A

- 4 × 12G SDI (4 × 4096× 2160@60Hz)
- 1 × HDMI2.1 (7680 × 4320@60Hz)
- 1 × DP1.4 (7680 × 4320@30Hz)

Option B

- 4 × 12G SDI (4 × 4096 × 2160@60Hz)
- 4 × HDMI2.0 (4 × 4096 × 2160@60Hz)

FLEXIBLE FRAME RATE FOR SMOOTHER VISUALS

Supports 240Hz frame rate, frame multiplexing and adaptive frame rate, providing a super smooth filming.

4×4K FRAME MULTIPLEXING, REALIZED WITH JUST ONE UNIT

The CX80 Pro has an ultra-high 8K loading capacity. When shooting virtual scenes, a single device can perform four 4K@60Hz frame multiplexing, greatly simplifying the system and costs.

ADAPTIVE FRAME RATE, FREE SWITCHING

Automatically adapts to video input with variable frame rates ranging from 23 Hz to 240 Hz , and supports custom frame rates with a step as small as 0.01 Hz .

COLOR ADJUSTMENT AT YOUR FINGERTIPS

Curve adjustment and importing of 3D LUT files let you manage color in creative and artistic ways, just like a Hollywood colorist. Color Replacement supports unrestricted color replacement, with minimal impact on other colors. 14CH color correction will preciselyadjustment of hue, saturation, and brightness of primary, secondary and tertiary colors, with basic admustment of black and white, ensuring perfect colors that retain their intended beauty.

SHUTTER FIT TO ELIMINATE SCAN LINES

Through shutter fit, the shutter speed of the camera is synchronized, and the parameters of the display screen are automatically adjusted to adapt to the exposure time and frame rate of the camera, effectively eliminating scan lines.

STUNNING IMAGE QUALITY WITH ENHANCED DETAILS

Image
Booster

Dynamic
Booster

Full Grayscale
Calibration

Thermal
Compensation

LONG OPERATING TIME, NO COLOR CASTING

After the LED screen has been running for a period of time, reddish textures appear on the screen due to uneven heat dissipation. Through thermal compensation technology, the thermal characteristics of the LED screen are calibrated,which can effectively solve the color bias caused by uneven heat distribution of the screen.

CONTRAST & BLACK LEVEL FOR IMPRESSIVE DETAILS

Allows independent adjustment of highlights and shadows by contrast and black level, avoiding overexposure in bright content but delivering rich details in dark content.

MEDIUM AND LOW GRAYSCALE REMAINS UNIFORM

Support full gray scale calibration, aiming at the non-linear characteristics of Mura shape under different gray scales, each gray scale has its own calibration coefficient, so that the LED screen is uniform and delicate under different brightness.

Simplicity Meets Power

VX SERIES

FEATURES

Large Loading Capacity

VX1000:
6.5 Million Pixels
10 Ethernet ports
Maximum width 10,240 pixels
Maximum height 8,192 pixels

VX600:
3.9 Million Pixels
6 Ethernet ports
Maximum width 10,240 pixels
Maximum height 8,192 pixels

3 Working Modes

Free switching among Video Controller & Bypass & Fiber Converter modes

Ultra-Low Latency

Down to 20lines with low latency on

3 Layers

VX1000:
Input 4K×1K@60Hz
3 layers with free scaling

VX600:
Input 2K×1K@60Hz
3 layers with free scaling

Flexible Control

Support mixed control of Ethernet cable and USB cable

Front Panel Color Adjustment

Input color adjustment, including brightness, contrast, saturation, and hue. Screen color adjustment, including Gamma, Temperature, RGB

FIBER CONVERTERS

FIBER SOLUTION

Perfect pair for **ALL**

CVT10 Pro is a brand new optical fiber converter, designed to work seamlessly with NovaStar controllers and processors to provide long-distance data transmission solution and to keep cabling simple.

It is equipped with 10 EtherCon and 2 opticalCON. Optical Ports are compatible with LC-LC interface.

It supports primary and backup units working simultaneously to ensure the safety and stability of data transmission.

With new industrial design and IP65 waterproof, CVT10 Pro is sturdy and durable. It can be easily truss-mounted, suiting the outdoor environment perfectly.
